

MagnaFilter®

MagnaFilter Removes Damaging Metal Filings that Spin-on Oil Filters Leave Behind!

Everyone knows that clean oil works better than dirty oil. Changing your oil at the recommended intervals is Good. Keeping your oil cleaner while your engine is running...is **BETTER!**

- Extends Engine Life
- Improves Fuel Economy and Performance
- Cleans your oil for 50,000 miles (80,000 km)
- Requires No Vehicle Modifications
- Does Not Effect Your Vehicle's Factory Warranty
- Provides Extra Protection for Stop & Go Driving & Towing
- **MagnaFilter** removes 99% of harmful metal particles from your lubrication system

MagnaFilter provides an inexpensive way to remove the harmful "dirt" that conventional oil filters miss. Most of the "dirt" in your engine is actually fine metal particles that act like sandpaper on your engine's fast moving parts, dramatically shortening engine life. To help better protect your engine, **MagnaFilter** adds patented magnetic filtration technology. The result is much cleaner oil...and everybody knows clean oil works better than dirty oil.

MagnaFilter works with your factory recommended oil filter and can stay on your vehicle for up to 50,000 miles (80,000 km). It will never clog or restrict oil flow.

If you want to protect your engine, install a **MagnaFilter** at your next oil change.

Your engine will thank you by running better **NOW**, and for years to come.

**MagnaFilter
Doubles Your Filter's
Power to Keep
Your Oil Cleaner!**

MAGNEFINE[®]

Magnetic In-line Filter

**Protect Your Automatic Transmission
with Magnetic Filtration!**

**Removes 99%
of Wear Metal
Contaminants!**

- Extends Transmission Life
- Improves Transmission Performance
- Specified by Ford, Chrysler and other leading automakers
- No Effect on Factory Warranty
- Added Protection for Hauling or Stop & Go driving

Factory transmission filters can miss most of the particles that are harmful to your transmission. **Magnefine** Filters removes over 99% of all metal particles and contaminants even down to 3 microns in size. This keeps your transmission cleaner, cooler, and dramatically reduces wear. Chances are your transmission will even shift more smoothly... and you'll be able to feel the difference. In fact, major automakers specify and install **Magnefine** Filters when their transmissions are serviced at dealerships.

Why? Because they know **Magnefine** Filters work.

**Protect Your Transmission TODAY...
with Advanced Magnefine Filter Technology!**
